

The diagram is a circular radar chart titled "Bieler Sicherheitsradar". It features a central white circle with the title. Surrounding this are four concentric rings, each representing a different level of risk or severity, labeled A, B, C, and D. The outermost ring is divided into segments, each representing a specific safety hazard. The segments are color-coded: red for the highest risk (A), orange for medium-high risk (B), yellow for medium risk (C), and light green for the lowest risk (D). The hazards listed around the perimeter include: "Verkehrsunfälle" (Traffic accidents), "Fussgängerunfälle" (Pedestrian accidents), "Zugunfälle" (Train accidents), "Angstorte" (Scary places), "streitigkeiten" (Disputes), "Littering", "Ruhestörungen" (Disturbances), "Cybermobbing", "Terroranschlag" (Terror attack), "Religiöser und politischer Extremismus" (Religious and political extremism), "Amoklauf" (Mass shooting), and "Autounfälle" (Car accidents). The text "Nicht beachten der Verkehrsregeln durch den Langsamverkehr" (Not paying attention to traffic rules due to slow traffic) is also present. The diagram is used to assess and communicate various safety risks in a structured and visual manner.
