

Assessment of the safety of public spaces in Sursee

How safe are the public spaces in the Swiss town of Sursee?
We worked together with various experts, town officials and concerned residents in a participative process to analyze the safety of the public spaces in the town as a whole and in the historic old town in particular. After compiling our findings in a comprehensive assessment, we developed suitable measures for improving the safety of the town's public spaces, both in a subjective and objective sense.

Our services

- Site inspections of security-relevant hotspots in Sursee
- Holding of two workshops featuring the use of crime mapping tools
- General assessment of the town's safety using criteria of crime prevention through environmental design (CPTED)
- Structured presentation of suitable measures
- Drafting of a brief report on the potential use of video surveillance in the historic old town
- Various meetings with the municipal council
