

Security accompaniment for Army Logistics Facility

The Swiss Federal Department of Defense, Civil Protection and Sport (DDPS) is the largest holder of real estate in Switzerland. The properties it owns include the field offices of the Swiss Army's logistics center. On such a site we accompanied the construction of a logistics hall. We supported the building management team from armasuisse Real Estate with the compliance with all integral safety requirements for the new construction of the logistics facility.

Our services

- Formulating the integral safety requirements in the project specifications
- Periodic review of the planning team's documentation of compliance with the specifications
- Assessing the fulfillment of the integral safety requirements at the end of the project
- Preparing a statement regarding the safety aspect of the utilization, safety and operating concept
