

"HotelWatt" Funding Program Management

As are other industries, the hotel industry in Switzerland faces major challenges when it comes to the sustainable use of energy. We are supporting hotel businesses in Switzerland in their attempts to save electricity sensibly and sustainably as part of the "HotelWatt" subproject within the ProKilowatt promotional program. The program is aimed at providing incentive for hotel businesses through subsidies for the implementation of relevant energy efficiency measures, making an important contribution to the energy transition.

Our services

- Promoting energy efficiency measures in the areas of lighting, kitchen, laundry and building services
- Monitoring and calculating the electricity savings of individual energy-saving measures
- Monitoring other ProKilowatt support programs such as "OfficeWatt"

Client

ProKilowatt, Swiss Federal Office of Energy (SFOE)

Facts

Period	2023 - 2026
Project Country	Switzerland
