

ColorWatt: Energy Efficiency in the Paint and Coating Industry

The ColorWatt Funding Program supports Swiss companies in the paint and coating sector to reduce their energy consumption. ColorWatt offers extensive subsidies when you replace your old appliances and systems - whether for lighting, ventilation, cooling, efficient painting systems or compressed air systems. Contact us today.

Measures

Beleuchtungs-
anlage

Ersatz konventionelle
Beleuchtung durch LED

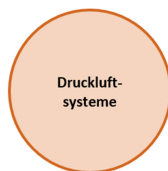

Lüftung und
Kälte

Ersatz von Lüftungs-
und Kälteanlagen

Lackier-
anlagen

Ersatz und Optimierung
Systemmassnahmen

Druckluft-
systeme

Ersatz und Optimierung
von Druckluftkompressoren

How it works:

- Plan your energy efficiency measures, such as for lighting systems, cooling systems, ventilation systems, paint and coating systems or compressed air systems
- Submit a funding application by email (quotation documents and brief project description) to receive a funding estimation
- Implement your renovation measures
- Submit final documents (final invoice) by email
- Receive funding

Client

ProKilowatt, Swiss Federal Office of Energy (SFOE)

Facts
